

# DAILY ACTIVITY DASHBOARD

## HOW TO ACCESS AND USE

The Daily Activity Dashboard (DAD) is an interactive visualization of data obtained by the Energy and Carbon Management Commission from Operators throughout the state.

### How to Access

From the ECMC website click on *Dashboard*, then scroll down to, “Click HERE to access the Daily Activity Dashboard.” This link will load the DAD.

### Getting Started

When initially launched the Dashboard will load **Pending Permits**. By default, the DAD will be set to a statewide view of the data. This data can then be filtered by County, Municipality, or other criteria depending on the active report. The year, permit type, etc. At the bottom of the Dashboard is a list of reports that are selectable. Current reports are: Pending Permits, Well Status, Production, Inspections, NOAV, Notifications, and Spills.

**Pending Permits**  
 Information on pending permit applications, both O2 and O2A

Type: **O2A** | **O2A Comment**

County: Pending O2 / O2A and open Public Comment 1/21/2023 4:00:41 AM

County Filter:  Adams,  Arapahoe,  Delta,  Garfield,  Larimer,  Rio Blanco,  Washington,  Weld

Municipality Filter:  (N/A),  Aurora,  Brighton,  Firestone,  Fort Lupton,  Greeley,  Loveland,  Northglenn

County	Spud Last 12 Months	Permitted But Not Spud
Weld	390	1025
Garfield	87	143
Arapahoe	30	14
Rio Blanco	21	96
Adams	4	38
Washington	2	2
Archuleta	0	35
Cheyenne	0	0
Delta	0	0
Gunnison	0	4
Huerfano	0	0
Larimer	0	3
Lincoln	0	1
Morfat	0	9

400796355		SRC Riverbend	33-8-7CHZ	SYNERGY RESOURCES CORPORATION	Weld	NENE	17	4N	67W	02	
400796446		SRC Riverbend	33-8-7NHZ	SYNERGY RESOURCES CORPORATION	Weld	NENE	17	4N	67W	02	

To export data hover the mouse over the upper right corner of table to be exported.

Click on the three dots, then select Export data

**Export data**

Which data would you like to export?

Summarized data

Underlying data

File format:

.xlsx (Excel)

Data will export with applied filters

[Learn about aggregates](#)

**Export** **Cancel**

The widow that opens select the desired format then click on Export. At this point a prompt will ask where to save the file with the data.

# Daily Activity Dashboard

## Additional Information

- 1) You can usually select single or multiple data points in graphs and charts to 'drill down' into the data displayed in the accompanying table. For example, using the NOAV, one can create a list of NOAV for Weld County in just August and September of 2016, by FIRST selecting Weld County (click box), and then selecting the August and September month bars in the chart. The current year (2016 in this case) is the default:

Data is not linked between all the graphs, charts, and tables, so you'll need to play around to see what does and doesn't work.

- 2) You can sort any table column by selecting black arrow that appears when hovering over column with mouse (see Facility ID column in figure table above for example).
- 3) You can expand any table, figure, chart, or frame to fill your whole screen by using the 'Focus mode' option that appears as a faint icon in the upper right-hand corner of any object. For example, using the Active Notifications page, we can make the Notice Type Breakdown fill the entire screen by clicking here:

## Daily Activity Dashboard

Note, that to return back to your previous screen from 'Focus mode', select the '< Back to Report' link in the upper left-hand corner (it's a bit hard to see). If you use the browser back button, you will exit the dashboard entirely.

The dashboard is built using a new application technology that is still being developed, and there are some limitations (hopefully these will be addressed in future updates):

- The dashboard has had minimal testing on phones, tablets, and other mobile devices – you may experience display issues.
- When you filter by county or year on one data page and then change to another, the selection will be reset, and you will have to apply the filter again.
- The columns in the tables are a fixed width automatically adjusted to the screen size and space of the user interface by the application. In some cases, the column names and data are truncated as a result. To see the data better, you can try using the 'Focus mode' icon in the upper-right hand corner of the table or figure of interest (as described above). However, using this option some data may still not be fully visible.
- There may be the rare occasion when information in the dashboard is outdated or not correct. Please use other ECMC database tools to confirm any critical information.
