Subject: Review of Project Rio Blanco Sampling and Analysis Plan

Dear Ms. Stanczyk:

The Department of Energy, Office of Legacy Management (LM), has reviewed the July 2010 (revision 1) Rio Blanco Sampling and Analysis Plan. LM supports the July 2010 revisions, including the changes in the configuration requirements from three miles to two miles from the emplacement well. LM would like all Application's for Permit to Drill within the notification area to contain language stating LM representatives will be allowed to collect periodic samples of gas and produced water from wells within the notification area.

Please contact me at 240-252-8506 if you have any questions.

Sincerely,

Jack Craig
Site Manager
